

- Helps to reduce basement dampness, and increases comfort
- Reduces heat loss to the surrounding environment
- Excellent vapor and radon barrier
- Unaffected by moisture and humidity
- Quick and easy to install - adds R-value

INSTALLATION METHOD #1 - Recessed Insulation

1. Unroll EcoFoil® Between-Joist insulation within the cavity, between studs.
2. Using the convenient staple tabs, recess the insulation material and affix to the studs.
3. Install drywall as per the usual method. The recessed insulation material will create the necessary airspace require for reflective insulation.

INSTALLATION METHOD #2 - Furring Strips

1. Fasten 1" - 2" thick furring strips to wall with shot fasteners or lag bolts.
2. Unroll EcoFoil® insulation horizontally, and staple to the furring strips.
3. Seal seams with EcoFoil® reflective tape.
4. Fasten an additional set of furring strips overtop of the insulation material.
5. Attach drywall as per the usual method.

SUGGESTED PRODUCTS FOR THIS APPLICATION:

- REFLECTIVE INSULATION > 2200 series - (available in various dimensions & edge formats)
- EcoFoil® REFLECTIVE TAPE > 15213 (3" wide)

Check local building codes for compliance before installation. This installation sheet is intended solely to illustrate the proper location and placement of EcoFoil® Reflective Insulation products in specific construction applications. They are not intended to illustrate proper construction methods (which is ultimately the responsibility of the builder or contractor). The installation instructions are only recommendations relating to the location and placement of EcoFoil® Reflective Insulation products, and EcoFoil® makes no claims that these construction systems are universally accurate.

All warranties and performance estimates are void if EcoFoil® Reflective Insulation products are used in exterior applications, or in non-enclosed systems or buildings.

Exercise caution when using EcoFoil® Reflective Insulation products near and around electrical wiring and devices.
