INSTALLATION METHOD

1. Install 1” x 2” furring strips on the inside and perpendicular to the girts on 24” centers.
2. Unroll the EcoFoil parallel to the furring strips.
3. Staple the edges of the EcoFoil Insulation to the center of the furring strips, at approximately 4” intervals down the center and into the furring strip.
4. Seal seams with EcoFoil reflective tape.

Builder’s Notes:
- If a white interior finish is desired, EcoFoil poly reflective insulation may be used. Install as per usual method, however with poly-white side facing interior.
- Use EcoFoil white poly tape to seal all seams and butt joints.
- When EcoFoil insulation comes in direct contact with ACQ lumber, it may discolour. This will not affect the overall insulation value of EcoFoil insulation.

SUGGESTED PRODUCTS FOR THIS APPLICATION:

<table>
<thead>
<tr>
<th>INSULATION PRODUCT</th>
<th>EF2220 Series or EF2520 Series (Reflective side MUST face the furring airspace)</th>
</tr>
</thead>
<tbody>
<tr>
<td>TAPE</td>
<td>EF15013, EF15012 (Reflective) or EF15853, EF15852 (White Poly)</td>
</tr>
</tbody>
</table>

a) Check local building codes for compliance before installation. This installation sheet is intended solely to illustrate the proper location and placement of EcoFoil Reflective Insulation products in specific constructions applications. They are not intended to illustrate proper construction methods (which is ultimately the responsibility of the builder or contractor). The installation instructions are only recommendations relating to the location and placement of EcoFoil Reflective Insulation products and EcoFoil makes no claims that these construction systems are universally accurate.

b) All warranties are void if EcoFoil Reflective Insulation products are used in exterior applications, or in non-enclosed systems or buildings.

c) Exercise caution when using EcoFoil Reflective Insulation products near and around electrical wiring and devices.
